LYFT Learning Origins
LYFT Learning’s underlying principle is Stewardship – using our gifts to help others around the world do the most possible with the gifts they are entrusted.

As a self-sustaining social enterprise, our profits are reinvested in our mission to underwrite the cost of creating and sharing knowledge. We also support several organizations dedicated to foster and orphan care. In our first year, we provided work experience for seven youth who are transitioning out of foster care.

Create, Translate and Share
digital knowledge and tools that successfully help individuals become self-sufficient.

✓ We identify and develop needed electronic content in a format that facilitates learner ease-of-use and long-term retention.
✓ We identify effective programs and tools currently in use around the world, then “package” them in a way that facilitates reuse.
